

Recommended Tools for K-Flex Elastomeric Insulation Installation

- K-Flex USA offers the widest range of flexible closed cell foam elastomeric insulation products available to the industry.
- Elastomeric tubular insulation is offered in slit, un-slit, and with a pre-applied adhesive seam seal system, as well as continuous coils.
- Elastomeric Sheet and roll products are available. Sheet and roll products are also available with pressure-sensitive adhesive.
- Elastomeric tubular and sheet /roll insulation is available with factory-applied cladding options.
- Tapes, cladding, fittings and pipe supports are available in addition to tapes and adhesives for use with factory-applied cladding systems.

Our insulation products are easy to apply with the use of simple tools that are readily available. An Installation Manual as well as individual Installation Guides are available from our website: www.kflexusa.com. Listed below are tools required to properly install our insulation products.

Tools Required

Knife	Tape Measure	Templates	Punches
Scissors	Blackboard Chalk/Marker	Calipers	Brushes (short firm bristles)
Miter Box	Metal Straight Edge	Dividers	Tee Square
Whetstone/File	Clamps		

Most tools are available at your local hardware store, home center, or can be ordered through a supply house. Recommended knives and brushes are sold through distributors. The following distributors stock Hyde and Dexter products, and agreed to low minimums and discounts. They ship anywhere in the USA. Catalogs are available upon request.
